Press Automation

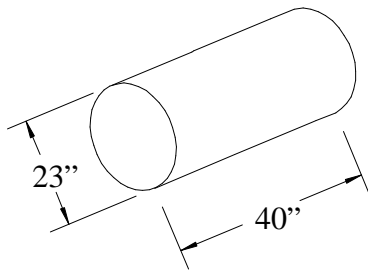

## General Capabilities

Bachhuber Mfg. Corp. is an ISO 9001 certified contract job shop specializing in CNC lathe and machine center machining. We are well equipped for general machining operations including milling, drilling, and tube bending & forming. Bachhuber Mfg. Corp. is also the manufacturer of BMC press automation equipment used in the stamping, die-cast, and forging industries.

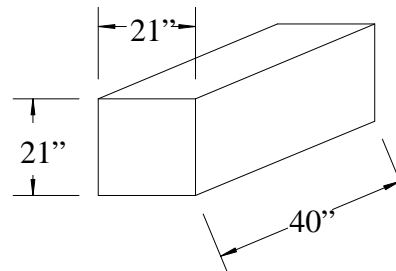

### Machining Capabilities:

Our CNC turning and vertical machining centers give us precise control on our machining resulting in high production of quality parts at competitive prices. Multi-axis work is our specialty with special emphasis on holding unusual shapes and machining difficult materials.

#### Lathe Capabilities

#### Machining Center Capabilities

### Types of Machined Parts:

Bachhuber can handle your needs from prototype to production from one to hundreds of thousands including:

• Pump Housings	• Engine Components	• Construction
• Valves	• Valve bodies	• Pistons
• Shafts	• Automotive	• Agricultural
• Military	• Lawn and Garden	• Secondary Work

### Types of Material Machined:

- **Castings:** Forging, Ductile, Gray Iron, Sand, Permanent Mold, Investment and Die-Casting, Stainless, Stellite, High Cobalt, Zinc, Aluminum, Aircraft Alloy, Brass, and Bronze
- **Bar Stock:** Rounds, Square, and Flats made from Alloy, Steel, Stainless, Aluminum Brass, Bronze, and Tool Steel
- **Tubing:** Rounds, Squares, and Rectangles made from DOM, Butt Welded, ERW, Mechanical, HR, and CD Seamless
